external timber shutters

external timber shutters

Timber shutters add colour and interest to the outside of a building and can really bring the façade to life. Our shutters are suitable for new homes and restoration projects, and are available with heritage or contemporary detailing.

Cedar West shutters are designed for external use around windows and doors, and feature fixed (non-moving) timber blades. All of our external timber shutters are custom built to size by experienced craftsmen, using high quality materials.

Light and heat control

External shutters provide excellent light and heat control. They can be opened to allow unobstructed views, or closed to filter sunlight and provide shade and privacy.

Timber Choices

Western Red Cedar
(ideal for blade stability)

KD Hardwood

Other timbers on request

Blade Profiles

Louvre Blade (JO1125)
40mm x 6mm

Louvre Blade (JO1127)
